Annual Report

IFMBE Affiliated Society:

*Slovak Society of Biomedical Engineering and
Medical Informatics*

For the period September 2006 - June 2007

PREFACE

The International Federation for Medical and Biological Engineering (IFMBE) is regularly receiving reports from the affiliated societies. The form we have developed is aimed to help the Secretary General of the affiliated society in reminding him of the usual activities of societies and from the other hand, enables all those who read the report to get a better, structured overview of the activities of both, a particular society and of all societies.

Societies that had filled out the complete form in 2004, 2005 or 2006 should send this simple form for the activities between September 2006 (WC2006) and June 2007 (MEDICON 2007) and to indicate changes in any other data.

GENERAL ASSEMBLY DELEGATES

For the number of delegates, please see

Bylaw 12: Delegates to the General Assembly.

The number of delegates which may represent each Member Organisation at the General Assembly shall, to the nearest integer, be equal to the common logarithm of the number of individual members in that organisation, as follows:

<i>Number of Members</i>	<i>Number of Delegates</i>
<i>31 or less</i>	<i>1</i>
<i>32 to 316</i>	<i>2</i>
<i>317 to 3162</i>	<i>3</i>
<i>3163 and above</i>	<i>4</i>

In those countries in which there are more than one organisation, which are Members of the Federation, the total number of Delegates at the General Assembly would be based on the number of the total membership of all the organisations that are Members of the Federation. The distribution of the number of Delegates within this total number shall, to the nearest integer, be in direct proportion to the number of members of the individual organisations.

If an actual membership number cannot easily be determined, as for instance when the Member is a national liaison body of several societies, the Administrative Council may negotiate with the Member Organisation an agreed effective number of members for the purpose of arriving at dues and the number of Delegates to be appointed.

If there is more than 1 delegate of your society, please copy this table.

REPORT:

During the reported period the Society co-organized international conference Measurement 2007 on May 20-24, 2007 with a session Measurement in Biology and Medicine. Another seminar on June 6-7, 2007 was devoted to eHealth in Slovakia and included a workshop about electronic medical records and their perspective in Slovakia.

Members of the Society within the reported were involved in graduate and postgraduate education in Biomedical engineering and Bionics and Biomechanics (in cooperation with Technical University Kosice, University of Zilina and Slovak Academy of Sciences).

Currently the Society is involved in preparation of the international conference Trends in Biomedical Engineering that will take place in September in Kladno, Czech Republic. During the conference, meeting of the Society committee will take place and electronic elections for the next office period will be discussed and prepared.
